

Bioprocess Transfer Hoses And Peristaltic Pump Tubing's

All components supplied to USP 23 Class V1 and FDA Conformance.

Flexible Transfer Tubing.

Silicone Rubber

Platinum cured silicone transfer and pump tubing, low-pressure transfer hoses.

Silicone & Connections

Moulded ends are available up to 38mm I/D and can be fitted to both hoses and tubing.

C - Flexl

TPE translucent tubing similar to silicone with good chemical resistance.

Flexible Hose Assemblies.

Silicone Rubber

High Pressure smooth bore silicone vacuum & delivery Bioprocess Transfer hoses.

Pure-Flon Ultra PTFE

Silicone covered smooth bore PTFE lined Bio-Process transfer hoses.

Ultra-Flon GP

Smooth and convoluted bore PTFE lined Bio-Process transfer hoses.

Peristaltic Pump Tubing.

PurePrene - Santoprene

Thermoplastic elastomer peristaltic pump and transfer tubing equivalent to Marprene.

GORE, Sta-Pure Tubing.

Sta-pure peristaltic pump tubing which can be supplied with moulded or swaged end connections.

GORE, ChemSure Tubing.

Extra long life pump tubing for the transfer of aggressive chemicals not compatible with alternative pump tubings..
