# CSI CAPABILITIES

ESTABLISHED IN 1996, CSI IS A LEADING SUPPLIER TO THE PHARMACEUTICAL AND NUTRACEUTICAL INDUSTRIES. WITH A FIRST CLASS PORTFOLIO OF PRODUCTS AND SERVICES WE WORK CLOSELY WITH CUSTOMERS, PROVIDING EXCEPTIONAL TAILOR-MADE SOLUTIONS TO MEET EXACT REQUIREMENTS AND BUDGETS. MANY OF OUR SOLUTIONS LEAD TO SIGNIFICANT COST SAVINGS AND MUCH IMPROVED PRODUCTION EFFICIENCY.

## COATING EQUIPMENT

The TECHNICOTA range provides effective methods for film and sugar coating of solid dosage products, with payloads of up to 500 litres.

## REFURBISHMENT & UPGRADE

With years of experience in tablet coating our expertise and knowledge provides the ultimate service for refurbishing and upgrading existing plants.

## INSTALLATION & COMMISSIONING

Our installation and commissioning teams work to the highest standards. All TECHNICOTA machines are tested to industry standards before and after installation and commissioning.

## VALIDATION

Supplying the pharmaceutical and nutraceutical industries often involves full validation; a full validation package is available on request.

## TRAINING

Effective training can minimise running costs and downtime whilst maximising efficiency. When working with CSI, training your staff forms part of our service,

covering machine workings and maintenance, plus a general overview of tablet coating if required.

## PROCESS SUPPORT

Our knowledge of tablet coating stems from years of experience within the industry, making our support services across the entire tablet coating process second to none, providing essential advice when needed.

## CALIBRATION

Our support extends to calibration, in the form of providing the documentation, training and procedures necessary for the pharmaceutical industry today.

## MAINTENANCE CONTRACTS

Regular maintenance, inspections and general care of tablet coating plants leads to higher efficiencies and a prolonged machine life. CSI are able to provide full maintenance contracts, including a full analysis of your plant and a comprehensive written report.

## SPARE PARTS

A wide range of competitively priced spare parts are available for our TECHNICOTA machines and spray nozzles.

# CSI MISSION

TO PROVIDE SPECIALIST, STATE-OF-THE-ART TABLET COATING SYSTEMS, THAT MEET STRINGENT QUALITY STANDARDS AND EXCEED CLIENT EXPECTATIONS.

## VALUES

With a commitment to reaching the highest quality standards through training and continuous improvements, our professional team believe in putting customers first.

## LARK TECHNOLOGY GROUP

CSI is part of the Lark Technology Group. Originally formed in 1989 as Lark Electrical by a small team of electrical engineers with many years experience in the food processing, chemical and petrochemical industries.

Lark Technology offer 'turn key' solutions and have the capability to design, manufacture, install and commission a wide range of control systems. Today the Group has a growing number of employees and carries out all system configuration, programming and software design work, in-house.

The customer base includes major players in world markets, Nestlé, Unilever, Bernard Matthews and IFF, and today CSI is building a powerful presence in the pharmaceutical industry worldwide.

## HISTORY OF CSI

**1989** - Lark Electrical was formed.

**1992** - Lark Electrical expand with integration of local electrical contractor.

**1996** - CSI was formed as an initiative by the founders, two highly experienced pharmaceutical engineers, to provide upgrades and a remanufacturing service for tablet coating plants in the pharmaceutical and nutraceutical industries.

At the same time, CSI developed their own spray nozzle incorporating the very latest flat jet air cap technology.

**2002** - The company proved highly successful in this field and merged with Lark Electrical to form the Lark Technology Group. This was a natural progression for CSI as Lark Electrical had been designing and supplying control systems to them for a number of years as well as providing on-site services for plant installations and modifications.

The merger provided an infrastructure for the business and a platform to move forward, allowing joint expertise and development skills to create the new products.

**2004** - CSI introduce OEM (Original Equipment Manufacturer) equipment to their product portfolio.

**TODAY** - The TECHNICOTA range of tablet coating plants has been successfully launched and continues to be supplied, installed and maintained for clients across the globe.
